

Standing for Change in Washington is Easier for Some Than for Others.

It's hard enough having to maneuver around Congress when you're seeking support for your cause. But when you're trying to do it on one leg, it's even harder.

That's why the American Orthotic and Prosthetic Association is urging Congress to pass bills S. 3223 and H.R. 2575, giving amputees comparable benefits for prosthetic arms and legs to those they would receive for any other medical or surgical treatment.

Currently, insurance companies are using arbitrary caps and lifetime limits, which may not be enough to reimburse amputees for even the most rudimentary prosthetic and orthotic devices. And it's certainly not enough to cover today's prosthetics that can greatly improve an amputee's mobility.

Please urge Congress to pass S. 3223 and H.R. 2575, the bills that will enable amputees to get the medically necessary devices they need to lead full, productive lives.

Because in America, arms and legs are not a luxury. For more information go to any of the following sites:
