Update on CMS Resumption of Medicare Audits

On July 10, [we informed you](#) that the Centers for Medicare and Medicaid Services (CMS) announced the resumption of certain audit activity beginning on August 3, 2020.

AOPA, through its involvement on the DME MAC Advisory Councils has since learned that CMS has clarified the scope of the audits that will resume on August 3. CMS will not be restarting all audits on August 3, but instead due to the continued Public Health Emergency (PHE) will be implementing a phased approach to allow suppliers time to prepare and adjust. The audits will begin with limited DME MAC based post-payment reviews and will only involve claims with dates of service prior to the beginning of the declared PHE on March 1, 2020.

As of now CMS did not provide a timeframe for the next phase or for the renewal of audit activity through the Target, Probe, and Educate (TPE) program, RAC audits or SMRC audits. CMS also reiterated that the DME MACs may allow for flexibility with extensions and the cancelling of audits based on individual supplier's ability to complete the audit.

AOPA will continue to monitor the resumption of CMS audit activity and provide you with timely updates.

Questions regarding these issues may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

Correct Coding Reminder for Scoliosis Braces

The Durable Medical Equipment Medicare Administrative Contractors (DME MACs) and the Pricing, Data Analysis and Coding (PDAC) contractor just released a correct coding reminder for five base codes used to describe scoliosis braces: L1000, L1005, L1200, L1300 and L1310.

The L1005 (tension-based scoliosis and accessory pads), L1300 (other scoliosis procedure, body jacket molded to patient model) and L1310 (other scoliosis procedure, post-operative body jacket) are considered to be complete devices and all inclusive. The use of any other addition codes will be considered unbundling and incorrect coding.

The L1000 (CTLSO, Milwaukee, inclusive of furnishing initial orthosis) is a custom fabricated scoliosis brace and the following addition codes may be incorporated into the brace and are eligible for separate payment: L1010, L1020, L1025, L1030, L1040, L1050, L1060, L1070, L1080, L1085, L1090, L1100, L1110, and L1120. The listed addition codes will also be denied as not separately payable if build with a base code other than the L1000.

The L1200 (TLSO, inclusive of furnishing initial orthosis only) may have the following addition codes incorporated into the brace and are eligible for separate payment: L1210, L1220, L1230, L1240, L1250, L1260, L1270, L1280, and L1290. The listed addition codes will also be denied as not separately payable if build with a base code other than the L1200.

A copy of the full correct coding reminder may be found [here](#).

Questions regarding these issues may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

Facility Site Visits and Accreditation Requirements Re-Instated

The Centers for Medicare and Medicaid Services (CMS) recently updated their COVID-19 Medicare Provider Enrollment Relief frequently asked questions document. In the document they stated that CMS will resume all accreditation and reaccreditation activities, and provider enrollment site visits as of July 06, 2020. These activities were previously suspended as part of the response to the declared public health emergency (PHE) for COVID-19.

If you initially enrolled after March 3, 2020 without obtaining the appropriate accreditation you must now submit a completed application to your Accrediting Organization (AO) within 30 days of notification from the National Supplier Clearinghouse (NSC). If you have received an extension for an expiring supplier accreditation due to the PHE you will be contacted by the NSC to begin the reaccreditation process. Certain accreditation and reaccreditation activities may be conducted onsite and in-person, virtually or a combination of both depending on your state's reopening plan. All onsite survey activities will be conducted in accordance with the Center for Disease Control (CDC) and local guidelines

If CMS, the NSC or one of their agents conducts an in-person provider enrollment site visit the inspector will follow all state and local requirements regarding the use of appropriate personal protective equipment (PPE) when conducting the site visit.

CMS is still temporarily ceasing all revalidation efforts for Medicare providers or suppliers until further notice.

You may access the complete updated FAQ document [here](#).

Questions regarding these issues may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

CMS Announces the Resumption of Medicare Audits and New Implementation Date for Medicare Prior Authorization

The Centers for Medicare and Medicaid Services (CMS) recently updated its COVID-19 Reduction of Provider Burden Frequently Asked Questions (FAQ) document to provide updates on the resumption of Medicare audit activity and revised implementation dates for Medicare prior authorization of six lower limb prosthesis codes.

Resumption of Medicare Audits

The FAQ was updated to indicate that CMS has authorized Medicare contractors (e.g. DME MACs, RACS, SMRCs, etc.) to once again perform pre-payment and post-payment audits as part of their medical review responsibilities. CMS had suspended most audits as of March 30, 2020 due to the COVID-19 Public Health Emergency (PHE). In the updated FAQ, CMS indicates that due to the "importance of medical review activities to CMS' program integrity efforts, CMS expects to discontinue exercising enforcement discretion beginning on August 3, 2020, regardless of the status of the public health emergency." CMS indicates that if individual providers are selected for medical review believe that responding to a request for documentation will create a hardship situation, they should discuss response options with the contractor performing the review. It is important to note that CMS authorized the reinstatement of all Medicare audits, not just audits of orthotic and prosthetic claims.

The timing of the resumption of audit activity is surprising considering that the PHE remains in effect and AOPA will be communicating our concern to CMS about the burdens that renewed audit activity will place on providers that are already operating under challenging circumstances.

Update on Medicare Prior Authorization

The updated FAQ also included new implementation dates for the Medicare Prior Authorization program for the six lower limb prosthesis codes (L5856, L5857, L5858, L5973, L5980, and L5987) that had their original implementation delayed due to the COVID-19 PHE. CMS announced that Medicare prior authorization for the six codes will begin in the four states previously selected for the initial roll out (PA, MI, TX, and CA) on September 1, 2020 and will be implemented nationally on December 1, 2020.

AOPA has developed resources to assist members to understand how the prior authorization process will work and what to expect from it. These resources, including live and on demand education opportunities will be made available to AOPA members soon.

[View the updated CMS FAQ document.](#)

Questions regarding these issues may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

CMS Releases New HCPCS Code: K1007

CMS and the Healthcare Common Procedural Coding System (HCPCS) workgroup has published the coding decisions from their inaugural biannual Durable Medical Equipment and Accessories; Orthotics, Prosthetics, and Supplies HCPCS code application review cycle.

As part of this first biannual code application review cycle CMS has released the new code K1007 (Bilateral hip, knee, ankle, foot device, powered, includes pelvic component, single or double upright(s), knee joints any type, with or without ankle joints any type, includes all components and accessories, motors, microprocessors, sensors). The K1007 will be effective for claims with a date of service on or after October 01, 2020.

Questions? Contact Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

DME MACs and PDAC Release Joint Publication Announcing Coding Verification Requirement for Six Lower Limb Prosthetic Codes that Will Require Medicare Prior Authorization

On June 26, 2020, the Durable Medical Equipment Medicare Administrative Contractors (DME MACs) and Pricing, Data Analysis, and Coding Contractor (PDAC) released a joint announcement for a new coding verification requirement for the six lower limb prostheses that were previously announced as subject to Medicare prior authorization. While implementation of Medicare prior authorization has been postponed due to the COVID-19 public health emergency, it is expected that the program will be implemented in the future.

The joint publication announced that, effective for claims with dates of service on or after January 1, 2021, the only products which may be billed using codes L5856, L5857, L5858, L5973, L5980, and L5987 are those for which a written Coding Verification Review has been made by the PDAC and is listed on the PDAC Product Classification List.

In addition to the joint DME MAC/PDAC publication announcing the coding verification requirement for the six prosthetic codes discussed above, the four DME MACs simultaneously released a revised version of the Lower Limb Prosthesis Policy Article (PA) with an effective date of August 1, 2020. The revised PA includes new coding guidelines for L5856, L5857, L5858, L5980, L5981 and L5987. Coding guidelines for L5973 were published in a previous (January 2020) PA revision.

AOPA's Coding and Reimbursement Committee will undertake a comprehensive review of the Policy Article coding guideline revisions as well as the coding verification requirement and will engage in collaborative discussions with the PDAC and the DME MACs.

The joint publication announcing the coding verification requirement may be viewed [here](#). And view the revised Lower Limb Prosthesis Policy Article [here](#).

Questions may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

Revised ABN Form Released

The Advance Beneficiary Notice of Noncoverage (ABN) form is subject to re-approval every three years, and the current version of the ABN was approved in 2017 and expired in March 2020. The approval of a new ABN, form CMS-R-131, by the Office of Management and Budget (OMB) was postponed due to COVID-19 and suppliers were directed to continue using the expired form.

The new ABN, form CMS-R-131, has recently been approved and released by the OMB and CMS. There were no substantial changes made to the content or directions for use of the ABN.

The use of the revised ABN will be mandatory on August 31, 2020 and may be downloaded [here](#). To verify if you are using the most recent version of the ABN, on/after August 31, check the expiration date on bottom left corner of the form and it should be 06/30/2023.

For questions, contact Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

PDAC Coding Verification Reminder for L3960

Effective for all claims with a date of service on or after August 1, 2020 the only braces which may be billed using code L3960 (SEWHO, abduction positioning, airplane design, prefabricated, includes fitting and adjustment) must have a written PDAC coding verification and listed on the PDAC Product Classification list.

Questions? Contact Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

Registration Open for the 2020 AOPA Virtual National Assembly

Even though we won't be face-to-face, the 2020 Virtual National Assembly will have it all...

- The best in business education and advanced clinical programming offered in general sessions, poster presentations, and engaging concurrent breakouts.
- A robust exhibit hall.
- Roundtable discussions with the most influential people in the profession.
- Fun events such as coffee breaks and live entertainment.
- The opportunity to earn a substantial amount of CE credits. Education will be available 30 days post Assembly, giving you the opportunity to go back and attend multiple concurrent sessions.
- An easy to use platform that is mobile, computer, and tablet responsive. Plus, access to training and a dedicated help desk.
- No travel required, saving you time and money.

You won't want to miss out, [register today!](#)

View the tentative schedule [here](#) and stay tuned for the specifics on education.

Questions? Contact info@AOPAnet.org or (571) 431-0876.

COVID-19 Update: Paycheck Protection Program Changes

Last week Congress finalized legislation to ensure that businesses that received a forgivable loan through the Paycheck Protection Program (PPP) can have more leeway on how to spend those funds.

Under the newly-passed Paycheck Protection Program Flexibility Act of 2020 small businesses would have to spend just 60 percent of the loan money on payroll instead of 75 percent as outlined in the original law. In addition, current PPP borrowers can choose to extend the eight-week period of the disbursement to 24 weeks, or they can keep the original eight-week period if their business has sufficiently recovered. New PPP borrowers will have a 24-week covered period, but the covered period can't extend beyond December 31, 2020. Borrowers can use the 24-week period to restore their workforce levels and wages to the pre-pandemic levels required for full forgiveness. This must be done by December 31, 2020, a change from the previous deadline of June 30, 2020.

The bill includes two exceptions allowing borrowers to reach full PPP loan forgiveness even if they aren't able to fully restore their workforce. Previous guidance already allowed borrowers to exclude from those calculations employees who turned down good faith offers to be rehired at the same hours and wages as before the pandemic. The new bill allows borrowers to adjust because they could not find qualified employees or were unable to restore business operations to February 15, 2020, levels due to COVID-19 related operating restrictions.

Finally, the bill extends a June 30, 2020 deadline to rehire workers, pushes back the timeline for repaying loans, and allows companies that get loan forgiveness to defer payroll taxes.

The President is expected to sign the bill into law shortly. For questions, please contact Justin Beland, Director of Government Affairs at jbeland@AOPAnet.org, and keep checking our [COVID-19 resources page](#) for more updates.

AOPA Statement Concerning Systemic Racism

The death of George Floyd, the protests, and the disproportionate impact COVID-19 is having on racial and ethnic minorities and the poor and socially disadvantaged among us has once again brought to the forefront the long-standing issue of systemic racism in this country.

The American Orthotic and Prosthetic Association (AOPA) stands with our members in opposing systemic racism and believes it is time to meaningfully address the impacts it has on our society. Until we do, a large percentage of the patients AOPA members serve, those living with limb loss/difference and limb impairment in disadvantaged communities, will never be truly healthy.

Now more than ever, it is imperative to reflect on the values of the orthotics and prosthetics profession and its patients, to remember character is not only what we believe but what we do. As Martin Luther King, Jr. observed, "The ultimate tragedy is not the oppression and cruelty by the bad people but the silence over that by the good people."

Today, we reaffirm our values, beliefs, and commitments. We cannot solve these problems alone, but AOPA is committed to the principles of diversity, equality, and inclusion with each other, our allied healthcare professionals, and in all patient interactions. AOPA is committed to health equity and to improving the health outcomes of our patient populations. AOPA stands united, ready to learn, grow, and work toward a better future.

COVID-19 Proof of Delivery Signature Requirements Reminder

In response to the COVID-19 pandemic CMS previously announced that they are temporarily waiving signature requirements on proof of delivery (POD) documentation, when a signature cannot be obtained due to COVID-19, for dates of service during the public health emergency.

In this situation, suppliers should document in the medical record the appropriate date of delivery and that a signature was not able to be obtained because of COVID-19. In addition, suppliers should use the CR modifier and include a brief narrative of COVID-19 on the claim.

Questions? Contact Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

CR & KX Modifiers During the COVID-19 PHE

The Durable Medical Equipment Medicare Administrative Contractors (DME MACs) have indicated that Medicare approved, physician-based telehealth visits, including those that meet the relaxed telehealth rules in effect during the COVID-19 public health emergency (PHE), will be considered compliant for purposes of establishing and documenting the medical necessity of Medicare covered services. Telehealth based physician encounters will also meet any face-to-face visit requirements that are incorporated into existing Medicare policies.

So, with claims with a date service on or after March 1, 2020 if a Local Coverage Determination (LCD) implied or required that a face to-face encounter was needed a telehealth visit may be substituted. This would include the Knee Orthoses LCD, the Diabetic Shoe LCD and the Ankle-Foot/Knee-Ankle-Foot Orthoses LCD.

Since, the telehealth visits are acceptable be sure to append the KX modifier to your claims, if and only if all other policy criteria has been met. If you are using the telehealth visit in lieu of an actual face-to-face visit you must also use the CR modifier and indicate "COVID-19" in the narrative field.

Questions regarding this issue may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

<p style="text-align: center;">COVID-19 Update: DME MACs Publish Guidance Regarding Physician Telehealth Visits During COVID-19</p>
--

AOPA staff recently participated in educational webinars presented by the Durable Medical Equipment Medicare Administrative Contractors (DME MACs) and on DME MAC provider advisory councils during which they confirmed that physicians, including MDs and DOs that are certifying the medical need for diabetic shoes may utilize telehealth to fulfill face-to-face encounter requirements during the COVID-19 Public Health Emergency (PHE).

On April 6, 2020 the Centers for Medicare and Medicaid Services (CMS) released an Interim Final Rule with Comment Period (IFC) that indicated for claims with dates of service on or after March 1, 2020, policy based "requirements for face-to-face or in-person encounter for evaluations, assessments, certifications or other implied face-to-face services would not apply during the COVID-19 PHE."

Additional guidance was provided on the IFC by the DME MACs on May 7, 2020 in a joint educational article. The DME MAC article indicated that while the IFC provided significant relief from policy-based face-to-face visit requirements, a subsequent CMS IFC that was issued on May 8, 2020 reiterated the statutory requirement to establish and document the medical necessity for Medicare covered services. The DME MAC article indicated that Medicare approved, physician-based telehealth visits, including those that meet the relaxed telehealth rules in effect during the COVID-19 PHE, will be considered compliant for purposes of establishing and documenting the medical necessity of Medicare covered services. Telehealth based physician encounters will also meet any face-to-face visit requirements that are incorporated into existing Medicare policies.

The DME MAC joint article indicated that the IFC based waiver of face-to-face encounter requirements only applies to policy-based requirements and therefore does not apply to face-to-face encounter requirements that are memorialized elsewhere, specifically those that are part of the DMEPOS Quality Standards or Social Security Act. This led to significant questions, especially related to Medicare coverage of therapeutic shoes which require in-person visits with the certifying physician and the supplier of the shoes. While the IFC allows certifying physicians to use telehealth encounters to certify the medical necessity of diabetic shoes, suppliers of diabetic shoes, including orthotists, prosthetists, and pedorthists will still be required to perform an in-person evaluation at the time of shoe selection and an in-person fitting of the shoes at delivery as these are addressed in Appendix C of the DMEPOS Quality Standards.

Access the [DME MAC guidance article](#) on the CMS IFC.

Questions regarding this issue may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

AOPA's CMS Data Portal: Data at your Fingertips

Looking to develop a new product? Want to see who is currently using what product?

Using AOPA's CMS Data Portal you can access comprehensive, easy to use, easy to read Medicare Part B orthotic and prosthetic claims data from the last five years (previous years are available with special request). The data is updated annually to ensure you have the most recent data at your fingertips.

Just set your search parameters and in a matter of minutes get data to:

- Understand the current market in terms of size, geographic distribution, and provider specialty
- Predict growth and opportunities
- Compare historical and projected growth rates in Medicare
- Identify new product opportunities

You can download customized reports for use in your own reports and marketing material.

This CMS Data Portal is free to AOPA members. To access it all you need is your AOPA member username and password.

[Login and unlock the data!](#)

CMS Announces Suspension of Medicare Advance Payment Program during COVID-19 Public Health Emergency

On April 26, 2020, the Centers for Medicare and Medicaid Services (CMS) announced that it is re-evaluating payments made to Medicare Part A providers through the recently expanded Accelerated Payment Program and suspending the Advance Payment Program for Medicare Part B providers effective immediately.

The Medicare Accelerated and Advance Payment Program (AAP) is a longstanding program that authorizes Medicare contractors to make up to three months of expected Medicare payments to Part A providers (accelerated payments) and Part B providers (advance payments) during a public health emergency that results in the disruption of claim submission or claim processing. In early April, CMS announced it was expanding the AAP program to include Medicare Part A and Part B providers impacted by the COVID-19 Public Health Emergency, allowing them to receive accelerated and advance payments from Medicare as a means to temporarily maintain adequate cashflow to support their businesses.

The April 26 announcement indicates that due to Medicare accelerated and advance payments of approximately \$100 billion to providers through the AAP program to date, and the \$175 billion of appropriated grant funds through COVID-19 related provider relief legislation, CMS is reevaluating the AAP program and is reviewing all new and pending applications for Medicare Part A accelerated payments and suspending the Medicare Part B advance program outright, no longer accepting new applications for advance payments from Part B providers.

The CMS announcement may be reviewed [here](#). AOPA is reviewing the CMS announcement including its potential impact on AOPA members and will provide CMS with appropriate comments.

Questions regarding this issue may be directed to Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

Other Updates:

- If you haven't yet, please complete our COVID-19 survey. It shouldn't take more than 10 minutes and will help us develop our next set of actions, guidance, and resources. If you are a Patient Care Facility take [this one](#): if you are a Supplier take [this one](#).
- Looking for guidance and resources on how to deal with COVID-19? Visit our [COVID-19 Responses and Resources webpage](#). You can also share your experiences on the [Member-to-Member page of the Co-OP](#).
- We hope to see you in Las Vegas, September 9-12 for the 2020 National Assembly. At this point, registration will open late May with an exciting offer, Patient Care Facility members can buy one registration, get one registration for FREE. Stay tuned for more.

Calling all AOPA Members, You Now Have FREE Access to AOPAversity

AOPA knows you and your employees are being tremendously impacted by COVID-19. To help, we are offering you, our AOPA members, the ability to access our online learning management system, AOPAversity, for **FREE** for the rest of 2020. It is our hope that this will make it easier to navigate the current unprecedented situation.

What does this mean? You and your employees can now access all 72 online offerings which are pre-recorded videos available on demand. That's 33 business offerings worth 34.5 Business Credits and 39 clinical offerings worth 60.5 Scientific Credits. **FREE**.

If you do not currently have an AOPAversity account, click [here](#) to create a profile. You will need your AOPA member ID and zip code affiliated with your membership when you create your profile to access the free offering. If you already have an AOPAversity account, log in [here](#). Your username is the e-mail used to create your profile.

This offer is valid through December 31, 2020. It does exclude any refunds to purchases made prior to the start of this offer. We truly hope this offers you additional support during this uncertain time.

Questions? Contact Ryan Gleeson at rgleeson@AOPAnet.org.

COVID-19 Update: Clarification on Emergency-Based Waivers Guidance

AOPA has received questions and concerns from members about CMS guidance regarding replacement of DMEPOS during COVID-19. To address these questions and concerns, AOPA has been in contact with the DME MACs to discuss actions that they will take to implement the provisions of these emergency-based waivers.

During a recent presentation the DME MACs addressed some of our questions. Specifically, they stated that the 1135 waivers only apply to replacements that are necessary as a direct result of the emergency. For example, a patient is being transported to the hospital with COVID-19 symptoms and the brace is lost in the ambulance.

A beneficiary's inability to make an appointment or see the referring physician does not qualify under the waiver's current provisions. It must also be stressed that the waivers don't apply to new services such as socket replacements.

When providing a replacement item under the waiver, suppliers are reminded to include a narrative description explaining why the item needs to be replaced with their claims and must maintain documentation for the need of the replacement item. Suppliers must also use the CR modifier on their claims. Find more information on the waiver [here](#).

CMS and the DME MACs continue to make sure every effort is made to ensure that Medicare and Medicaid beneficiaries continue to have complete access to clinically appropriate medical care during this emergency. And as a result, information and guidance is continually being released and revised. AOPA will continue to provide this information and guidance as it becomes available.

In the meantime, AOPA members should continue to make every effort to obtain the appropriate documentation to support the O&P services they provide.

Questions? Contact Joe McTernan at jmcternan@AOPAnet.org or Devon Bernard at dbernard@AOPAnet.org.

AOPA's COVID-19 Responses, Guidance, and Resources

To say we are in unprecedented times would be an understatement. Since my last message, the American Orthotic and Prosthetic Association (AOPA) leadership has continued to closely follow the coronavirus disease (COVID-19) and its widespread impacts. We have also been taking your calls and emails and hearing firsthand how extremely difficult and uncertain things are for you, your businesses, and your patients.

To that end, we are responding with support. We are responding with outreach to legislators about how they can best support the O&P profession. We are responding by providing guidance on regulations like documentation, telehealth, and stay at home orders. We are responding by pulling together resources. We are responding by creating a space on the Co-OP to share your experiences and strategies with one another.

All of this can be found on the newly developed [COVID-19 Response and Resources webpage](#). We will be updating this webpage frequently with actions, guidance, and resources as well as pushing out updates via email, SmartBrief, and our social media channels.

Thank you for all you continue to do for your patients and the O&P profession. The Board and staff are here to support you so that you can do this. If you have questions, concerns, or needs do not hesitate to reach out to any of the staff at info@AOPAnet.org.

CMS Releases a Provider Toolkit of Resources Related to COVID-19

The Centers for Medicare & Medicaid Services (CMS) has released a [Virtual Toolkit](#) to help providers stay up-to-date on CMS materials available on COVID-19. The toolkit provides multiple links to valuable information for providers, caregivers, Medicare beneficiaries, and other CMS partners.

AOPA believes that the toolkit is a valuable resource and encourages AOPA members to review and utilize the resources as needed.

Thank you to our 2020 Supplier Plus Members
